

Bring Your Own Device (BYOD) Policy for Staff, Parents and Visitors

This policy is made available to all parents, prospective parents, staff and prospective employees of Hurlingham School on our website, and a hard copy can also be viewed at our School Office and applies to all aspects of Hurlingham School's work, including the Nursery and Early Years Foundation Stage (EYFS).

Introduction

The school recognises that mobile technology offers valuable benefits to staff from a teaching and learning perspective and to visitors. Our school embraces this technology but requires that it is used in an acceptable and responsible way.

This policy is intended to address the use by staff members and visitors to the school of non-school owned electronic devices to access the internet via the school's internet connection, to access or store school information, or to make photographs, video, or audio recordings at school. These devices include smart phones, tablets, laptops, wearable technology and any similar devices. If you are unsure whether your device is captured by this policy please check with the school's Head of Media and Computing Resources. These devices are referred to as 'mobile devices' in this policy.

Sections one to three and five of this policy apply to all school staff and to visitors to the school. The rest of the policy is only relevant to school staff.

This policy is supported by the Policy Regarding the Acceptable Use of Computing and Online Safety including Mobile Phones.

The Board of Directors of the school is responsible for the approval of this policy and for reviewing its effectiveness. The Board of Directors will review this policy at least annually.

Policy statements

1. Use of mobile devices at the school

Staff and visitors to the school may use their own mobile devices in the following locations:

- In a classroom where there are no EYFS (Nursery or Reception Pupils) present and, in the case of visitors, only with the permission and under the supervision of the teacher.
- In the school environs – Main Hall, Dance and Drama Studio or Large Music Room and in the Arts Centre during performances, in the School Offices on the Ground Floor and the Admin offices on the Second Floor of the Putney Bridge Road site.

Staff and visitors to the school are responsible for their mobile device at all times. The school is not responsible for the loss or theft of or damage to the mobile device or storage media on the device (e.g. removable memory card) howsoever caused. The School Office must be notified immediately of any damage, loss, or theft of a mobile device, and these incidents will be logged.

Mobile devices must be turned off when in a prohibited area and/or at a prohibited time. On the Gwendolen Road site, all members of staff working in the Nursery must keep their mobile devices in the locked cabinet in the staff room while EYFS children are on site.

The school reserves the right to refuse staff, parents and visitors permission to use their own mobile devices on school premises.

2. Use of cameras and audio recording equipment

Parents and carers may take photographs, videos or audio recordings of their children at school events for their own personal use. Parents are asked not to take photographs of other pupils, except incidentally as part of a group shot, without the prior agreement of that pupil's parents.

Parents are reminded that such images are for personal use only. Images which may, expressly or not, identify other pupils should not be made accessible to others via the internet (for example on Facebook), or published in any other way.

Other visitors and staff may use their own mobile devices to make photographs, video, or audio recordings in school provided they first obtain permission to take photographs, films or recordings of the relevant individuals. This includes people who might be identifiable in the background. Permission will, under nearly all circumstances, not be granted should the images have the potential to include children.

To respect everyone's privacy and in some cases protection, photographs, video, or audio recordings should not be published on blogs, social networking sites or in any other way without the permission of the people identifiable in them. Parents or carers should avoid commenting on activities involving pupils other than their own in photographs, video, or audio.

No one must use mobile devices to record people at times when they do not expect to be recorded, and devices must not be used that would enable a third party acting remotely to take photographs, video, or audio recordings in school. Staff must comply with the school's social media policy and anti-bullying policy when making photographs, videos, or audio recordings. Staff must also adhere to the school's **Taking, Storing and Using Images of Children Policy (Appendix 2 below)** which prohibits the use of mobile phones (or any devices connected to the internet) to photograph children.

3. Access to the school's internet connection

The school provides a wireless network solely for use in conjunction with the school owned laptops. Members of Staff and visitors are not given the Wi-Fi password except in very exceptional circumstances and for use only under the close supervision of the Head of Media and Computing Resources.

4. Access to school IT services

School staff are permitted to connect to or access the following school IT services from their mobile devices:

- the school email system and services provided in association with this email service such as Google Drive;

using their mobile devices AND / OR

Some of the School's administrative staff are also able to access the Database and files stored on the network to view school information on their mobile devices, including information about pupils via the school's secure virtual private network (VPN). In order to use the VPN staff must ensure that they follow all of the procedures and security measures put in place the Head of Media and Computing Resources. Staff must not store the information on their devices, or on cloud servers linked to their mobile devices. In some cases it may be necessary for staff to download school information to their mobile devices in order to view it (for example, to view an email attachment).

Staff must only use the IT services listed above and any information accessed through them for work purposes. School information accessed through these services is confidential, in particular information about pupils. Staff must take all reasonable measures to prevent unauthorised access to it. Any unauthorised access to or distribution of confidential information should be reported to the school's Head of Media and Computing Resources, Headmaster or Principal as soon as possible.

Staff must not send information regarding pupils or colleagues to their personal email accounts.

If in any doubt a device user should seek clarification and permission from the school's Head of Media and Computing Resources before attempting to gain access to a system for the first time. Users must follow the written procedures for connecting to the school systems.

5. Monitoring the use of mobile devices

The school may use technology that detects and monitors the use of mobile and other electronic or communication devices which are connected to or logged on to our wireless network or IT systems. By using a mobile device on the school's IT network, staff and visitors to the school agree to such detection and monitoring. The school's use of such technology is for the purpose of ensuring the security of its IT systems, tracking school information.

The information that the school may monitor includes (but is not limited to): the addresses of websites visited, the timing and duration of visits to websites, information entered into online forms (including passwords), information uploaded to or downloaded from websites and school IT systems, the content of emails sent via the network, and peer-to-peer traffic transmitted via the network.

Staff who receive any inappropriate content through school IT services or the school internet connection should report this to the Head of Media and Computing Resources as soon as possible.

6. Security of staff mobile devices

Staff must take all sensible measures to prevent unauthorised access to their mobile devices, including but not limited to the use of a PIN, pattern, password or preferably isometric data to be entered to unlock the device, and ensuring that the device auto-locks if inactive for a period of time.

Staff must never attempt to bypass any security controls in school systems or others' own devices.

Staff are reminded to familiarise themselves with the school's e-safety, social media and acceptable use of IT policies which set out in further detail the measures needed to ensure responsible behaviour online.

Staff must ensure that appropriate security software is installed on their mobile devices and must keep the software and security settings up-to-date.

7. Compliance with Data Protection Policy

Staff compliance with this BYOD policy is an important part of the school's compliance with the Data Protection Act 1998. Staff must apply this BYOD policy consistently with the school's Data Protection Policy.

8. Support

The school takes no responsibility for supporting staff's own devices; nor has the school a responsibility for conducting annual PAT testing of personally-owned devices.

9. Compliance, Sanctions and Disciplinary Matters for staff

Non-compliance of this policy exposes both staff and the school to risks. If a breach of this policy occurs the school will respond immediately by issuing a verbal then written warning to the staff member. Guidance will also be offered. If steps are not taken by the individual to rectify the situation and adhere to the policy, then the mobile device in question may be confiscated and/or permission to use the device on school premises will

be temporarily withdrawn. For persistent breach of this policy, the school will permanently withdraw permission to use user-owned devices in school.

10. Incidents and Response

The school takes any security incident involving a staff member's or visitor's personal device very seriously and will always investigate a reported incident. Loss or theft of the mobile device should be reported to Reception in the first instance. Data protection incidents should be reported immediately to the Principal who is the school's data protection controller.
